

- ❑ Download SQL2000SampleDb.msi from the Northwind and pubs Sample Databases page at <http://go.microsoft.com/fwlink/?LinkId=30196>. Run the installer to create the instnwind.sql and instpubs.sql T-SQL scripts in the \Program Files\Microsoft SQL Server 2000 Sample Database Scripts folder. Installation adds a Microsoft SQL Server 2000 Sample Database item to the Programs menu.
- ❑ Download AdventureWorksDb.msi from the Microsoft Web site by searching for “SQL Server 2005 Express Documentation” (include the quotes). Run the installer to create the \Program Files\Microsoft SQL Server 2005 AdventureWorks Sample Database Scripts folder and add the OLTP (awdb), Analysis Services (awasdb), and data warehouse (awdwdb) folders, which contain T-SQL scripts to install each AdventureWorks version. Installation adds a Microsoft SQL Server 2005 AdventureWorks Sample Databases item to the Programs menu.

If you install the AdventureWorks sample databases from the SQL Server 2005 Developer Edition or higher setup program, you don't need to download them.

Install the Sample Databases to SQL Server 2005 Developer Edition or Higher

The following instructions require prior installation of SQL Server Management Studio (SSMS). If you have the post-RTM version of SMSS for SQL Server 2005 Express, you can use it to install the sample databases under SQLX. If you don't have a graphical management program for SQLX, skip to the “Install Sample Databases to SQL Server 2005 Express” section.

You can install Developer Edition under Windows XP SP2 or later. SQL Server 2005 Standard Edition and higher require Windows 2000 Server or Windows Server 2003. You also can use the full SMSS version to install the sample databases to SQLX.

Northwind and pubs

To install the Northwind database and, optionally, pubs, do this:

1. Open SSMS, and connect to your SQL Server 2005 instance.
2. Choose File ⇨ Open ⇨ File, navigate to the \Program Files\Microsoft SQL Server 2000 Sample Database Scripts folder, and double-click instnwind.sql.
3. Connect to your SQL Server 2005 instance to load the script into a new query window.
4. Click Execute to run the script.
5. Optionally, repeat Steps 2 through 4, but select instpubs.sql in Step 2.

This book doesn't include examples that require the pubs database.

AdventureWorks

Installation of the AdventureWorks OLTP database is system drive-dependent. To install the database, do the following:

1. Open SSMS, and connect to your SQL Server 2005 instance.
2. Choose File ⇨ Open ⇨ File, navigate to the \Program Files\Microsoft SQL Server 2005 AdventureWorks Sample Database Scripts\awdb folder, and double-click instawdb.sql.
